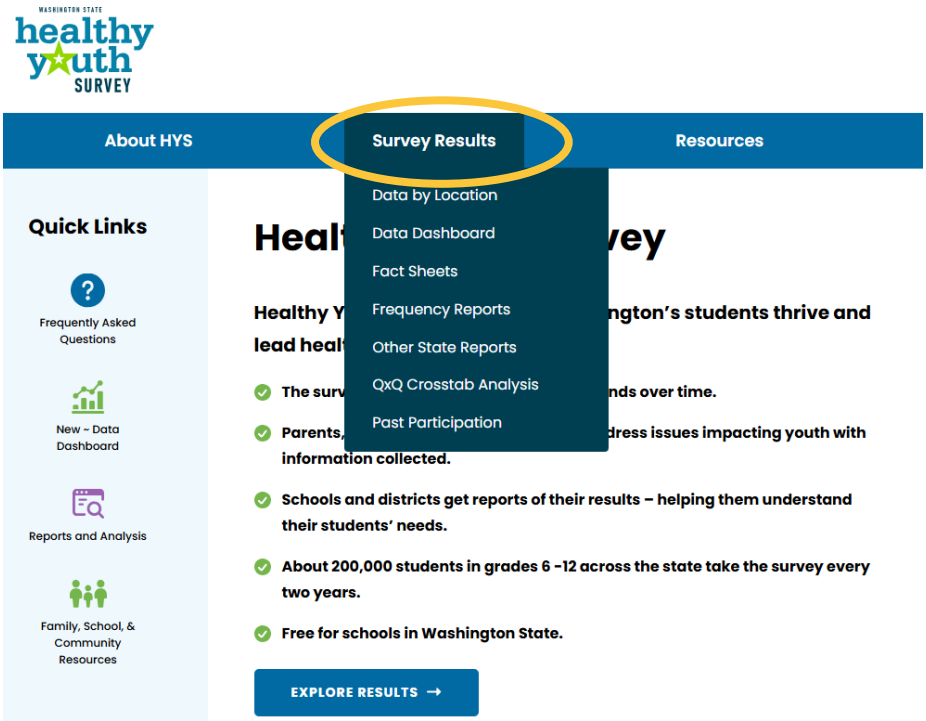
How to Access Healthy Youth Survey Results

Who can access the survey results?

- State, County, and ESD level data is publicly available on www.askhys.net.
- Superintendents are the "owners" of their Healthy Youth Survey results data are determine who gets access to district and/or building level data.
  - ☐ If you receive permission to access district or building level data, you can access it by logging into the www.askhys.net website, using your EDS credentials.

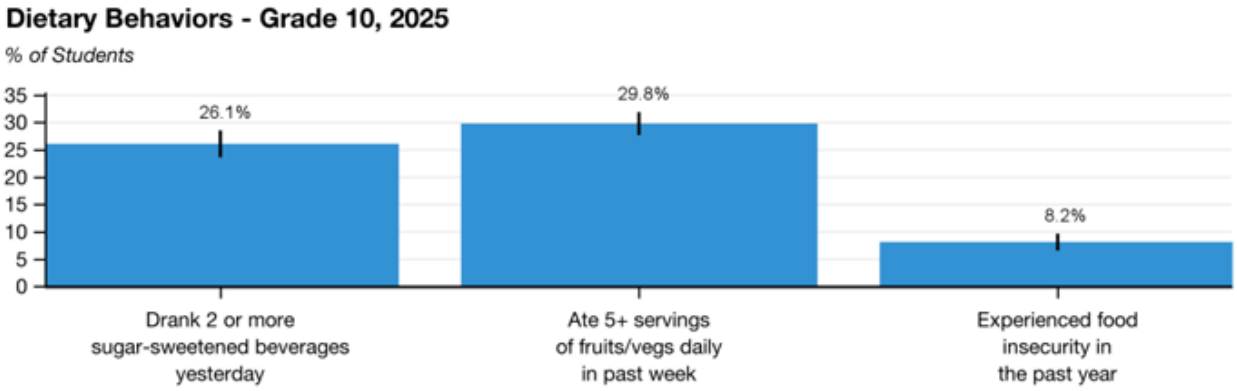
  - ☐ If you do not have access to your district or building level data and believe you should, contact your District's Security Manager. A list of Managers can be found here: Office of Superintendent of Public InstructionHow can I view the results?

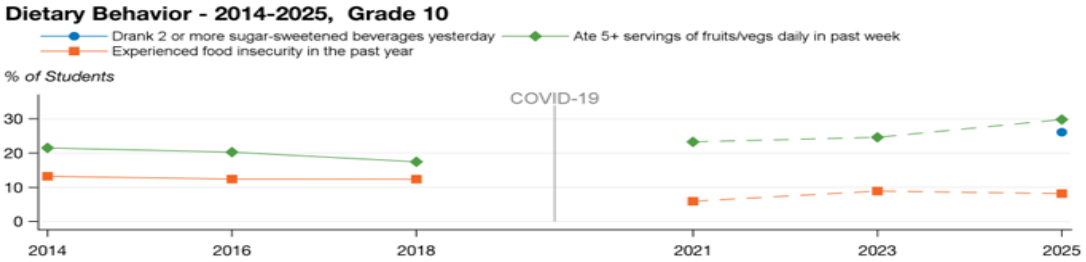
The results can be viewed in several different formats, but all results can be found by clicking on the Survey Results tab at the top of the page.



Fact Sheets

Fact sheets provide information on important HYS topics at the state and local levels with pre-formatted fact sheets. These give you a high-level look at the data. Fact Sheets also provide some background on the data, trends, and includes the different demographics. There are not Fact Sheets for every topic.





The trend plot above shows measures of Dietary Behavior between 2014 and 2025 for Grade 10. The measures and values are:

Measure	2014	2016	2018	2021	2023	2025
Drank 2 or more sugar-sweetened beverages yesterday	*not asked of grade*	*not asked of grade*	*not asked of grade*	*not asked of grade*	*not asked of grade*	26.1% ±2.5%
Ate 5+ servings of fruits/vegs daily in past week	21.5% ±1.5% ▼	20.3% ±1.2%	17.5% ±1.6% ▼	23.3% ±1.8% ▲	24.6% ±2.6%	29.8% ±2.1%
Experienced food insecurity in the past year	13.2% ±1.5%	12.4% ±1.2%	12.4% ±1.4%	5.9% ±1%	8.9% ±1.2%	8.2% ±1.5%

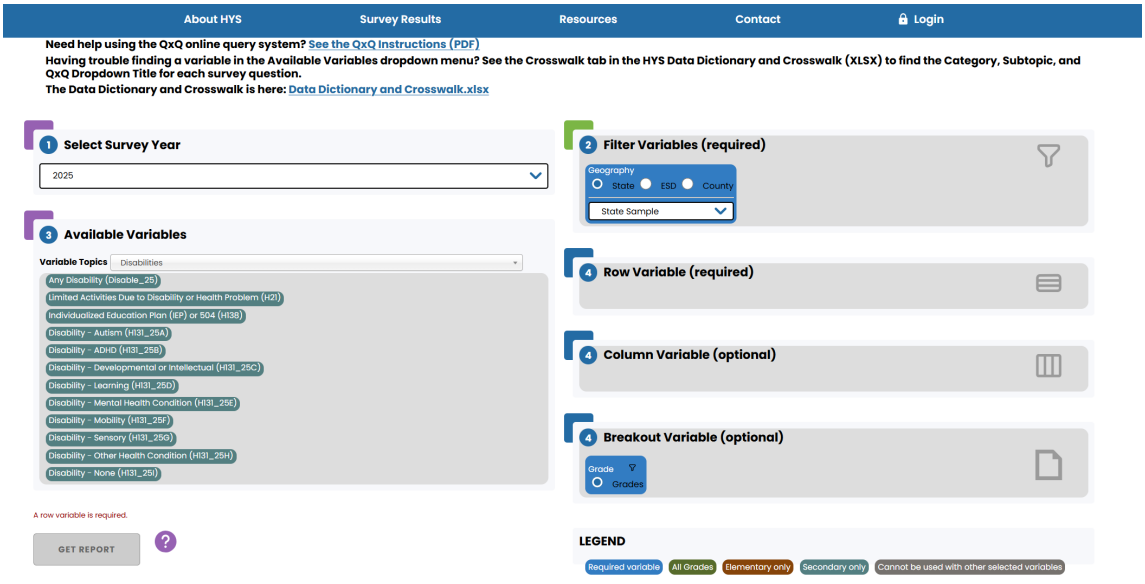
Frequency Reports

The Frequency reports allows you to see results for all survey questions with state, county, or ESD level reports. You can select based on individual or multi-grade. These reports include highlights of local results, then go question by question and display the number of students, the percent of the prevalence of students who responded, as well as the confidence interval for you to see in the parenthesis.

80. How often do you eat a meal with your family?	(n=3,076)	
Never	3.2%	(±0.7)
Rarely	10.9%	(±1.4)
Sometimes	21.2%	(±1.3)
Most of the time	38.8%	(±1.7)
Always	25.9%	(±1.5)

QxQ Crosstab Analysis

This interactive data query system allows you to cross-tabulate two variables to look at their interaction with each other.

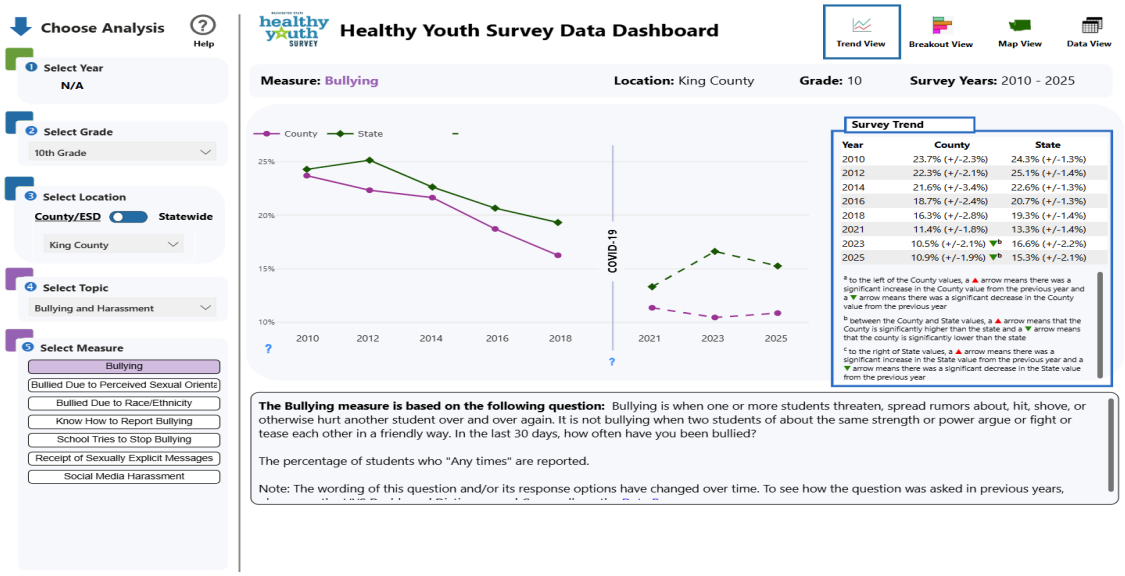


Data Dashboard

A feature added in 2023, the Data Dashboard allows you to view a survey topic with an interactive map, trends, and results by demographics for the state, counties, and Educational Service Districts (ESD). You can also download aggregate data from the dashboard. There are four different views to select from on the Data Dashboard.

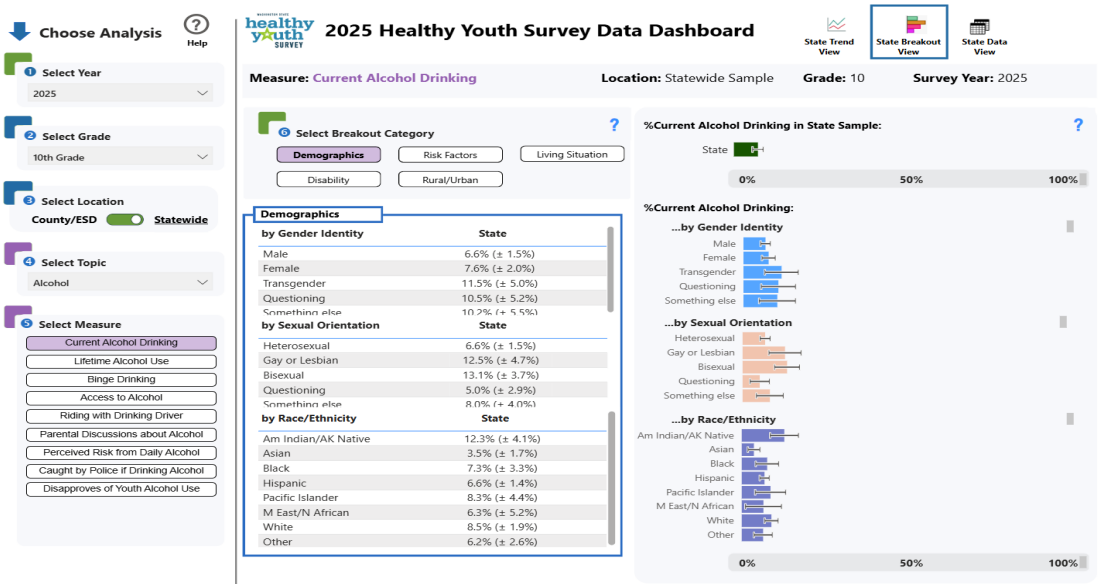
Trend View

Trend view allows you to view trends based on survey topics. This does not display all of the questions that are asked on the survey. This view also provides a table that shows if there is a significant increase or decrease. Arrow up=significant increase, arrow down=significant decrease.



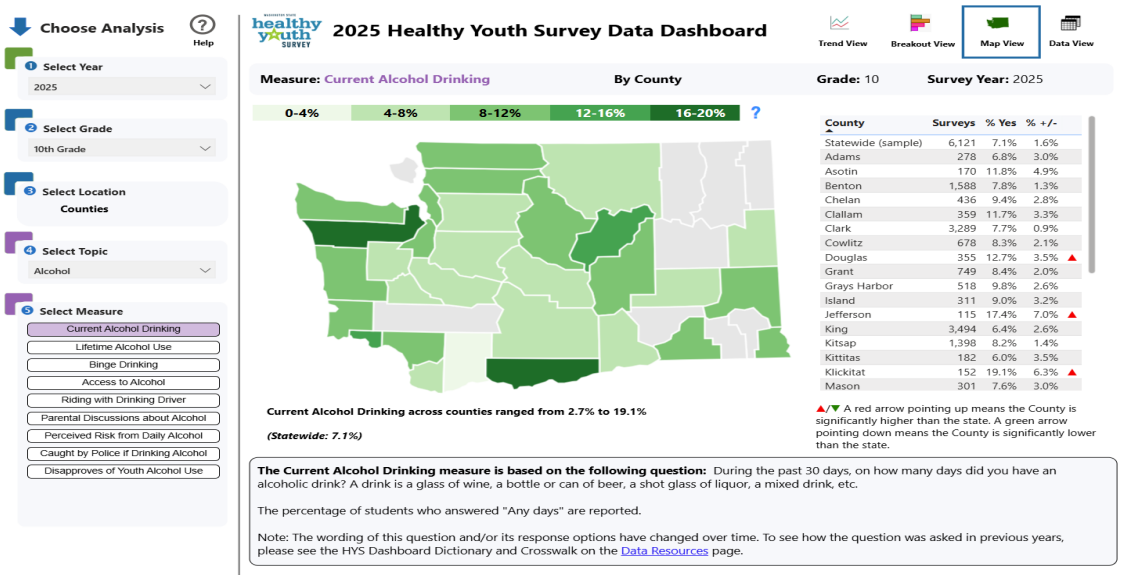
Breakout View

Similar to the breakout page on the Fact Sheet, this view allows you to take your chosen measure and break it out by category: demographics, risk factors, living situation, disability, and rural/urban.



Map View

This view shows statewide results with color responding to the different survey categories' responses. The table provides comparison from county to state.



Data View

Breakout and trends have the tables, and the data view gives you the numbers. You can download these as Excel sheets.
