

OSSI Grants Allowable Activities

Introduction

When using Office of System and School Improvement (OSSI) funding, there are certain accounting categories that we can fund, others that we cannot.

This information, in concert with the [Definitions of Allowable Activities document](#), will assist in planning the use of these improvement dollars.

Note: the allowable activity categories vary between state and federal funding sources. Be sure to know the funding source for your grant to ensure you can fund the activities you have planned. This information is available on the [Continuous Improvement Resources page of the OSPI website](#).
