Overview

Fuel Education partners with schools and districts to fuel personalized learning and transform the education experience inside and outside the classroom. The company provides innovative solutions for pre-K through 12th grade that empower districts to implement and grow successful online and blended learning programs. Its open, easy-to-use Personalized Learning Platform, PEAK, simplifies administration and enables teachers to customize courses using their own content, more than 500 FuelEd courses and titles, third-party partner content, as well as open educational resources. Fuel Education offers the industry's largest catalog of flexible digital curriculum, certified instruction, professional development, and educational services tailored to district and student needs. FuelEd has helped more than 2,000 school districts to improve student outcomes, better serve diverse student populations, and expand students' educational opportunities by leveraging the power of technology-enabled learning.

- Honors
- Remedial
- Standard

Students

Fuel Education's mission is to create a world of learners. Our mission compels us to provide all students with access to rich and varied learning opportunities, supported by world class online educators. FuelED provides online classes designed to meet the needs of all students, from at-risk students who have had trouble succeeding in the traditional classroom, to high achieving students seeking classes their schools cannot provide for them. With nearly 140 Online High School and Middle School Courses, including our specially designed Credit Recovery courses, we offer one of the largest available catalogs in 6-12 online education.

Student-Teacher Contact Requirements

Fuel Education teachers use an individualized approach to instruction that builds relationships and motivates students to strive for excellence. Before being assigned a virtual or blended classroom, all FuelEd instructors are required to complete 20 hours of online training. Using the same Learning Management System (LMS) that they will be teaching on, the instructors experience the same environment their online students face while learning skills necessary to teach our curricula. This training covers best practices in online instruction, how to communicate in the virtual environment, as well as skills and tasks associated with the specific platform and tools they will use. Communication is key to the success of any online education program. That's why FuelEd instructors communicate frequently with their students via e-mail, in threaded online discussion boards, during online sessions, and even on the phone.

Courseware Platform

Fuel Education uses Brightspace D2L learning management system.
