Criterion 6: Using multiple student data elements to modify instruction and improve student learning

	Unsatisfactory	Basic	Proficient	Distinguished
1f: Designing Student Assessments	There is no plan for assessment, or the assessments will not provide evidence that students have learned the intended outcomes.	Assessments will partially help the teacher know that students have learned or are learning the intended outcomes.	Assessments are planned throughout the instructional process and provide timely and valuable information to teachers and students.	Students will have the opportunity to demonstrate mastery of content and analyze their own progress through multiple, flexible assessments.

3d: Using Assessment in Instruction	Formative assessment is not used during instruction or is not aligned to the instructional purpose of the lesson.	Formative assessment partially supports student learning and development.	The teacher and students use formative assessments to illicit evidence of understanding, analyze progress, and provide constructive feedback.	Students take initiative to analyze their own progress against a clear standard in order to achieve the outcome and identify new opportunities and challenges.
4b: Maintaining Accurate Records	There is no system for documenting student progress, or the system is ineffective at communicating progress to students and families.	The teacher documents some aspects of student progress, in a manner that is accessible to students and families.	The teacher documents student progress towards mastery, focusing on the attainment of learning and developmental goals; students have access to and engage in reflection on their progress.	Students monitor progress towards mastery in their own attainment of learning and development goals; they regularly analyze and discuss their progress with the teacher and their families.
