

Flow Chart Example

Open Doors Youth Reengagement

Purpose of the Flow Chart

The flow chart shows how the district and its partners work together. Further, it summarizes how students enter and participate in the district's Open Doors program(s). All the Open Doors Youth Reengagement programs and partners should be represented in the district's flow chart.

- As new partners are brought on by the district, the flow chart will change.
- Provide the flow chart to all Open Doors partners in the district, and to OSPI
- Student identification, orientation/intake, and program pathways are commonly included.
