

Intervention Intensification Strategy Checklist

Use these ideas, as well as your own, to intensify interventions. For more information about intensifying interventions, check out our website, www.intensiveintervention.org. *Before adapting or intensifying an intervention, always consider whether the current intervention program has been implemented with fidelity and for a sufficient amount of time.*

Strength: Teams can increase the strength of an intervention by focusing on strategies and attention given to other dimensions of the [Taxonomy of Intervention Intensity](#).

Dosage

Increase opportunities for practice and corrective feedback.

- Increase the length of intervention sessions.
- Increase the number of intervention sessions per week.
- Decrease the group size.
- Increase the total number of sessions.
- Decrease the heterogeneity of the groups (group students with similar performance levels).
- Consider an intervention setting with fewer distractions.
- Embed additional practice and feedback sessions throughout the day.
- _____

Alignment

- Increase instructional time for the target skill.*
- Supplement intervention with National Center on Intensive Intervention materials in [reading](#), [math](#), or [behavior](#).
- Focus on discrete skill instruction within the target skill.
- _____

Attention to Transfer

- Align instructional routines and language with core instruction and the environment.
- Preteach content.
- Embed guided practice on target skills within core instruction and other environments.
- Embed explicit opportunities in other settings to maintain skills acquired in the intervention.
- Explicitly teach connections.
- _____

Comprehensiveness or Elements of Explicit Instruction

- Use precise, simple language to teach key concepts or procedures.
- When introducing a concept, provide worked examples and show the steps in writing.
- Present a completed work example. Explain why a specific step is important and have the student complete that step and explain its significance.

- Model new concepts with examples and “think aloud” as you work through steps.
- Use explicit instruction and modeling with repetition to teach a concept or demonstrate the steps in a process.
- Fade steps from examples, so that students gradually assume responsibility for completing more and more steps.
- Once students can complete entire examples and explain their work, incorporate fluency-building activities to develop automaticity of skills.*
- Once students can fluently produce correct work, move to a new concept. Provide ongoing practice opportunities to facilitate skill maintenance.*
- Increase opportunities for student response and practice through unison choral responding, peer activities, and opportunities for the student to perform with adult feedback.*
- Break academic or behavior tasks into smaller chunks or steps.
- Provide concrete learning opportunities (including role play and use of manipulatives).
- Have students explain new concepts, in their own words, incorporating the important terms you have taught.
- Provide sufficient opportunities for independent practice with feedback.
- Provide immediate and explicit error correction when mistakes are made, and have the student repeat the correct response before moving on. Offer repeated opportunities to correctly practice the step.*
- Increase the frequency of error correction and corrective feedback across learning environments.*
- _____

Behavior, Engagement, and Motivation Support

- Use a timer for intermittent reinforcement of on-task, appropriate behavior.
- Provide differential reinforcement or change the schedule of reinforcement.
- Create a motivation plan based on what you know about the student that provides frequent behavior feedback.
- Use a report card for home communication.
- Add a social skills group.
- Combine or align academic and behavioral supports.
- Convene a functional behavior assessment team to determine the function of the behavior.
- Use group contingencies to promote on-task, appropriate behavior.
- Use peer support to model and encourage desired behavior.
- _____

Other

- Change to an interventionist with more expertise, such as a reading specialist, behavior specialist, social worker, or special education teacher, depending on the student’s needs.
- Change the intervention to better meet the individual needs.
- _____

*These areas also are important to consider for dosage.
