EXECUTIVE SUMMARY

With the passage of House Bill 1599 in 2019, graduation pathways were established as one of the requirements for high school graduation. There are multiple ways for students to meet the requirements of graduation pathways, including test-based, course-based, and performance-based options. The pathway must be aligned with a student's postsecondary goals as described in their High School and Beyond Plan.

The Office of Superintendent of Public Instruction (OSPI) is required by [RCW 28A.655.260](#) to collect and report on graduation pathways data annually. This report includes the unique pathway options, a data summary, and disaggregated pathway completion data.

BACKGROUND

In 2019, the Legislature established different graduation pathways options as part of statewide high school graduation requirements through House Bill 1599. Graduation pathways focus on providing evidence that a student is ready for their next step after high school, whether that be employment, postsecondary education or training, or a military career. The graduation pathway(s) a student completes must be aligned with their postsecondary goal as described in their High School and Beyond Plan (HSBP).

The Class of 2020 was the first graduating class required to meet one or more graduation pathways. The Office of Superintendent of Public Instruction (OSPI) is required to report annually:

- Which pathways are available to students at each school district and State-Tribal Education Compact (STEC) school.
- The number of students utilizing each graduation pathway for graduation.
- Student participation in each pathway disaggregated by race, ethnicity, gender, and income status (as defined by their eligibility for free or reduced-price meals).

In addition to completing at least one graduation pathway aligned with their postsecondary goals, students must also earn 24 credits and complete their HSBP to meet all statewide graduation requirements.

Graduation Pathways

Graduation pathways start with the end in mind and are aligned with entry requirements of employers, postsecondary education or training institutions, or the military. Depending on how a student wants to work toward their postsecondary goals, any one of these options could likely support their goal.

Career and Technical Education (CTE) graduation pathways are a sequence of rigorous, related CTE courses that include dual credit options, industry recognized credentials, or a Core Plus program. Students completing a CTE pathway may plan to enter an apprenticeship or employment directly after high school or enroll in a training program, college, or university.

English language arts (ELA) and math pathway options include courses and/or exams. Students must complete an ELA component and a math component. Options include dual credit courses or exams (Running Start, College in the High School, CTE Dual Credit, Advanced Placement, International Baccalaureate, and Cambridge International), college transition courses, college entrance exams (SAT or ACT), and the statewide summative high school assessment (Smarter Balanced or WA-AIM). Students completing this pathway are likely planning for postsecondary education as their first step after high school.

The **military pathway** uses the Armed Services Vocational Aptitude Battery (ASVAB), an assessment required for entry into any of the branches of the military. Students completing this pathway are prepared to pursue their career goals across occupational fields through military service.

Pathway Data Collection

Reporting on [graduation pathways](#) requires compiling data from multiple data sources. The State Board of Education's (SBE) annual compliance report captures self-reported information about pathway availability from each school district/STEC. This is the most complete source to understand pathway availability because it collects information on district/STEC-sponsored testing events and course offerings.

To report on the count of students using each graduation pathway for graduation, OSPI compiles data across multiple sources, including:

- Course-based pathways (including college transition courses, dual credit, and CTE course sequences), identified using OSPI's student-level data collection.
- SAT exam and AP test score pathways, identified using files obtained from the College Board, the proprietary exam company offering those assessments.
- ACT, IB, and Cambridge International exam-based pathways identified using files from ACT, IB, and Cambridge respectively.
- ASVAB Armed Forces Qualification Test (AFQT) score provided by school districts/STEC and submitted to OSPI.

From these sources, OSPI can tell which graduation pathways a student completed but not which one was identified in the student's High School and Beyond Plan and used for graduation. Because of the flexible nature of these pathway options, many students may complete more than one pathway option.

Use of Waivers for the Class of 2023

In the spring of 2020, the SBE adopted rules for an emergency waiver program. SBE subsequently adopted permanent rules in July 2021. The purpose of this program is to allow school districts/STECs to waive certain graduation requirements (credits and/or pathway) on an individual student basis. The program is to prevent students from being unduly impacted by unforeseen disruptions to their education resulting from an emergency or disaster. [WAC 180-111-050](#) specifically addresses the waiver program to respond to the COVID-19 pandemic and applies to students through the 2023–24 school year.

Over five percent (5.3%) of the graduates in the Class of 2023 used a waiver for the graduation pathway requirement.

GRADUATION PATHWAYS DATA SUMMARY

OSPI has developed a series of data dashboards with information about graduation pathways for the Class of 2023. These dashboards will be updated with information for future graduating classes.

Pathway Availability

Understanding the current availability of graduation pathways is critical information for district/STEC planning, as well as for statewide policy. Using the dashboard, one can see how many students completed each available pathway at a selected district/STEC. Because of the flexibility of pathways, these counts are **not** unduplicated: A student may be counted as completing more than one pathway at a single district/STEC.

Number of Students Completing Each Graduation Pathway

The determination of which pathways are indicated in a students' HSBPs happens at the local level. OSPI's data reporting encompasses all completed graduation pathways, rather than what was indicated for each students' plan.

The graduates in the Class of 2023 completed the graduation pathways at the following rates. Some students completed more than one pathway, and thus there is some duplication across categories.

Pathway Completion, Disaggregated

Users can explore the graduation pathways [dashboard](#) to see how student groups completed the different graduation pathways. A snapshot of these data is below and includes all students in the Class of 2023 who have graduated as well as those who have not yet graduated. The implementation of graduation pathways has reinforced that the student groups who are the furthest from educational justice are completing the requirement at lower rates than their peers.

Table 1: Class of 2023 Graduation Pathways, Disaggregated*

	% Completed ELA/Math Pathway	% Completed ASVAB Pathway	% Completed CTE Graduation Pathway	% No Pathway	Number of Students in Class of 2023
All Students	53.7	5.6	52.1	21.9	85,306
American Indian/Alaskan Native	29.9	5.8	39.2	44.1	1,063
Asian	81.3	2.5	53	8.9	7,297
Black/African American	47.3	2.3	46.2	28.6	4,030
Hispanic/Latino of any race(s)	38.8	4.3	53.6	29.2	21,554
Native Hawaiian/Other Pacific Islander	34.4	4.1	45.9	38.1	1,172
Two or More Races	56.9	6.1	52	20.5	6,554
White	57.6	7.1	52.2	18.9	43,626
Students with Disabilities	23	2.9	50	37.1	10,976
Low-Income	39.5	5.4	50.2	30.1	45,070
English Language Learners	25.9	1.4	44.2	42.4	9,406
Female	55.6	5	49.6	21.2	40,947
Male	52.1	6.3	54.6	22.2	43,780
Gender X	42.5	2.6	38.3	38.3	579

*Includes all students in the Class of 2023; including those who graduated, are continuing their education, or have left school.

NEXT STEPS

In 2023, a new graduation pathway was approved by the legislature with the passing of [HB 1308](#). The new performance-based pathway allows students to demonstrate knowledge and skills in a real-world context providing evidence that the student meets or exceeds state learning standards in English language arts and mathematics. The performance-based learning experience may take a variety of forms, such as a project, practicum, work-related experience, community service, or cultural activity, and may result in a variety of products that can be evaluated, such as a performance, presentation, portfolio, report, film, or exhibit.

According to the [SBE webpage](#), "School districts must adopt a local policy that meets state requirements before offering the performance-based pathway option. Most school districts that are interested in offering this pathway will be able to offer it beginning with the Class of 2025. Some districts that have already laid groundwork may be able to begin with the Class of 2024. For example, districts that are already doing mastery-based learning and districts that have a local culminating project requirement may be able to develop this new pathway faster."

OSPI will continue to monitor graduation pathway completion and, in collaboration with the SBE, consider future policy recommendations to accelerate the growth of meaningful and useful graduation pathways, as well as focus on eliminating gaps in access for historically underserved student groups.
