

Harvest of the Month

BEETS

Nutrition Information

- Beets are considered an “other” vegetable
- Beets are high in both soluble and insoluble fiber.
- Good source of vitamin C and potassium
- Beet greens are high in vitamin A, vitamin C, calcium and iron.
- The beet root is a good source of vitamin C, potassium, riboflavin and folate.

Selection and Storage

- Choose beets that are about the same size so they will cook evenly.
- Beets should be rich in color, round, firm and smooth over most of the surface.
- Small to medium sized beets (up to 2½ inches across) have better flavor.
- Remove beet greens before storage to avoid shriveling.
- Beet roots can be stored in a bag in the refrigerator for up to 5 months without tops.

Fun Facts

- Beets were first cultivated by the ancient Romans.
- You can eat both the root and the leaves of the beet.
- Beets not only come in various colors like red, purple, orange and yellow, but also can be striped like a candy cane.
- Fresh beets are available year-round but are best from July through October.
- Beet juice has been used as a natural red dye since the 16th century.
- The heaviest beet on record weighed 52 lb. 14 oz!
- Beets have the highest natural sugar content among all other vegetables.
- One variety of beet, called a Sugar Beet, is used in making sugar.
