

OSPI Private Schools February 4, 2025 After-School Follow-Up Workshop Agenda

Neural Education

INSTITUTE FOR CONNECTING NEUROSCIENCE WITH TEACHING AND LEARNING

- Date:** February 4, 2025 (virtual)
Schedule: 4:00-6:00 pm
Clock Hours: 2 CCDEI clock hours will be available for each day through OSPI following the session. An online evaluation will be sent out within a week. This must be completed before your clock hours will be awarded.

Shining a Light on Engagement: Culturally Responsive Brain Rules

4:00pm: Welcome

4:15pm: Activating Student Agency Through Hope

Over 2,000 research studies have shown that hope can be nurtured and people can grow their capacity for hope. The neuroscience basis for hope is especially important and interesting for educators as we work to support our learners' engagement and growth in the aftermath of COVID shutdowns. Together, we'll explore practical, research-based approaches that will empower educators to design learning experiences that activate student agency and foster deeper engagement and learning.

The session will include multiple research-based resources and include time for participant reflection, revised thinking, and report out sharing of new understandings.

5:45pm: Closing

Additional resources will be shared with participants so that they can review and extend their learning.

Many participants find that taking notes is helpful for engaging and recalling learning. For this reason, we recommend that you have a notebook or other note-taking tool ready.
