

# *Education and Training Career Cluster/Pathways*

If you want to have a lifelong impact on others, then you will want to take a close look at the Education and Training Career Cluster. This family of classes and practical experiences develops the art of teaching, planning and administration in schools, colleges, technical institutes and businesses. Education is one of the basic rights of children in America, and states always need qualified teachers.

This career cluster is organized into three career pathways:

- Administration and administrative support
- Professional support services
- Teaching and training

## **Careers**

Students in education and training learn and practice skills that prepare them for diverse post-high school education and training opportunities, from apprenticeships and two-year college programs to four-year college and graduate programs.

CTE classes in this cluster will introduce you to a variety of interesting careers including:

- Superintendent, principal or administrator
- Teacher or instructor
- Preschool or kindergarten teacher
- Clinical, developmental or social psychologist
- Social worker
- Counselor
- Teacher assistant
- Parent educator
- Child care worker
- Coach
- Recreation worker
- Sign language interpreter

Note: Each school and school district has different CTE options. Not every district has classes in every cluster, nor does every district offer CTE dual credit and Advanced Placement options.

## Career and Technical Student Organizations

Career and technical student organizations are much more than clubs. They provide opportunities for hands-on learning, and for applying career, leadership and personal skills in real-world environments. Participants build their skills by developing projects, attending events, and competing regionally and nationally.

The student organization for education and training is Washington State Family, Career and Community Leaders of America (FCCLA).

## Education After High School

It is fact that young people who have at least one year of post-high school education earn thousands of dollars more a year. So, if you spend even one year at a two- or four-year college, in a certificate program at a technical school, or in an apprenticeship after you graduate from high school, you will very likely earn higher wages all your life. By furthering your education, you will be better-prepared to successfully navigate the world of work.

After taking CTE classes in education and training, you could pursue any number of opportunities including:

- A Child Development Associate (CDA) certification from the [Council for Professional Recognition](#). These can be completed while still in high school.
- An [apprenticeship](#)
- A two-year college program. Several colleges across the state offer an associate's degree in early childhood education.
- A four-year college program to earn a bachelor's in education or education administration
