

Physical Education Program Review Data Collection

More about this Collection

School districts are required to conduct an annual review of their physical education (PE) programs and submit the results to OSPI. [Revised Code of Washington 28A.230.055](#)

How the Data is Used

OSPI aggregates and analyzes the data, summarizes it by district, and posts it on the OSPI website, as required by the RCW. These are posted on [Health and Physical Education Laws & Resources](#). School districts are also required to submit results of this review to the district's wellness committee.

Instructions

Action Required

In April, OSPI will email district contacts materials and a link to complete the data collection. The link allows one entry per district. It is important that someone with a districtwide view of the Physical Education program complete this; this may be a district's Curriculum Director/Learning and Teaching Director or Physical Education Specialist. District contacts who receive the monthly Health & Physical Education newsletter (more below) will receive materials for this collection.

Key Dates

School districts must submit the PE program review by **June 30, 2026**.

Contacts

If you have any questions, please contact Denise Davis, Elementary Education Content Director, at denise.davis@k12.wa.us or Erica Olivera, Office Assistant 3, at erica.olivera@k12.wa.us.

Additional Information

District contacts can stay informed through the monthly Health & Physical Education newsletter. Any District Curriculum/Learning and Teaching Directors and Physical Education Specialists who do not yet receive the newsletter can [subscribe here](#) or adjust preferences. Subscribe by **April 15** to receive materials and the link to complete this collection.

For more about PE reporting requirements, visit [Health and Physical Education Assessments](#).

For more about data collections at OSPI, please visit [Data Collections at OSPI](#) or contact data.governance@k12.wa.us.
