

## *2026–27 Program Review Local Education Agency (LEA) Selection*

### **LEA Selection Process for Participation in Program Review**

OSPI used a risk-based selection process through an Annual Risk Assessment. LEAs with the highest risk assessment score were selected to participate in Program Review.

The Annual Risk Assessment is based on the following available data and weighted, highest to lowest, in the following order:

1. Last time the LEA participated in Program Review or Consolidated Program Review (CPR)
2. Percentage of schools identified for Comprehensive Supports as part of the Washington State Improvement Framework (WSIF)
3. Sum of federal ESEA funds
4. Items not fully implemented in previous Program Review or CPR
5. Elementary and Secondary Education Act (ESEA) program data

Charter Schools and State-Tribal Education Compact Schools are selected using a modified selection process. In the second and fourth years of operation or participation, the school will be selected to participate in a Program Review. In the following years, they are selected in the same manner as the districts.

To better support LEAs through the Program Review process, we are continuing our differentiation of the number of programs reviewed based on the size of the LEA. LEAs with fewer than 1,000 students enrolled, will receive a review of no more than three (3) applicable programs. LEAs with 1,000 to 3,499 students enrolled will receive a review of no more than six (6) applicable programs. LEAs with 3,500 or more students enrolled will receive a review of all applicable programs. Program selection is based on LEA funding, the last time the program was reviewed, internal program priorities, and internal program staff capacity.

## LEAs Selected to Participate in the 2026–27 Program Review Process

### LEAs with a review of no more than three (3) programs.

Boistfort School District
Bridgeport School District
Centerville School District
Cosmopolis School District
