

ROOTED IN EXCELLENCE

Griffin School District

OSPI recognizes Griffin School District for excellence in the Scratch Cooking category. Griffin serves scratch-made menu items four out of five days each week. The food service team actively invites student participation through regular taste tests. The student Compass Crew surveys their peers to learn which new entrées they want to see on the menu. Students also join staff in the kitchen to help prepare entrées and participate in taste tests with their classes.

"I believe the students realize they have a voice in what is served in the food service department. They will stop me in the halls to ask questions, provide feedback, and offer suggestions."
