

ROOTED IN EXCELLENCE

West Valley School District

West Valley School District earns recognition for excellence in marketing and promoting its school meal program. The school nutrition team actively engages families and the broader community by promoting the school food program through social media and monthly newsletters that share menu highlights, special events, and behind-the-scenes looks at kitchen operations.

In spring 2026, the district hosted the Junior Chef competition and a district-wide wellness challenge. These events encouraged students and families to participate in healthy eating while having fun with food.

"We're not just serving meals, we're building connections, promoting wellness, and inspiring a lifelong appreciation for nutritious food."
