PURPOSE/BACKGROUND

The purpose of this bulletin is to inform school districts of the calculation and distribution of their student transportation operations allocation for the 2022–23 school year. Allocation payments for September, October, November, December, and January were made in accordance with Revised Code of Washington (RCW) 28A.510.250, based on each district's Student Transportation Allocation Reporting System (STARS) allocation for the 2021–22 school year.

The STARS calculation process uses a regression analysis to determine the expected cost of operating school district transportation service based on the individual school district's characteristics. For the 2022–23 school year, the regression analysis used the fall, winter, and spring student counts and route data from the 2021–22 school year and the 2021–22 school year transportation expenditure data from each district's Form F-196 to determine the coefficients used in the funding calculation. The initial funding amount is then calculated using each district's reported data from spring 2022, fall 2022, and winter 2023. This initial amount is compared to the school district's prior year expenditures, and the lesser of these two values is selected.

A summary of the student transportation operation allocation for each district is attached to this bulletin. The summary shows the calculated allocation and the amount of any funding adjustment.

The details of the STARS calculation, including all adjustments, is available online at the Office of Superintendent of Public Instruction’s (OSPI) [Student Transportation Allocation Reporting System’s](#) website. Select the link marked “Operations Allocation Detail Report 1026A.” There is a drop-down list of districts. On the same page is a Description Detail Report (PDF) explaining the calculation process for the 1026-A Report.

Details of district reported data are provided in the following STARS reports: The Student Detail Report, the Route Summary Report, the Bus Summary Report, and the Route Detail Report. These reports are available in the reports tab within the STARS Educational Data System (EDS) and on OSPI’s Student Transportation STARS website (link shown above) under “Quarterly Reports”. All reports are combined into a single PDF file name starting with the report period and then “District Detail Report”. These reports are available in a drop-down menu.

Please contact your regional transportation coordinator if you find any errors with the data displayed on your Report 1026-A, or if you have questions regarding the calculation. Their contact information is provided below:
